- Scientific test: Continuous and random scientific checks during the manufacturing stage.
- Technical test : Continuous monitoring of packaging and dosage during production.
- Supply chain: Mayer & Sons monitors the entire chain from research and development to the distribution process.

# FILLERS

A UNIQUE AND FLAWLESS TECHNIQUE

We've got your entire face covered with three different types of filler: from fine lines at the corner of the mouth to deep wrinkles and sunken cheeks. Surface offers leading technology for your skin.

# Surface<sup>STYLE</sup>

PARIS

The visco elastic gel is biodegradable, homogeneous and has isotonic and monophasic properties. It is specifically designed to fill in wrinkles and fine lines in the face. **Surface Style** acts like a sponge when it is injected in these areas, filling in gaps and hydrating the skin. It rehydrates the area treated and boosts collagen production. This is a safe way to enhance the complexion and it produces instant results.

**Surface Style** treats different areas of the face, including: lip contour and surface lines. To achieve optimal results, an injection in the superficial to medium layers of the dermis is recommended.

# Surface<sup>ULTRA</sup>

PARIS

Over time, the skin on your face loses volume and appears less plump and less smooth. With age, cheeks tend to become hollow which leaves the face looking tired. **Surface Ultra** is a volumizing hyaluronic acid that corrects sagging skin, plumps up cheeks and improves their firmness.

This new range of products is at the forefront of the cosmetic industry. **Surface Ultra** not only corrects lines and wrinkles including nasolabial folds and frown lines, but can also be used to plump up lips, rejuvenate and moisturize the skin. Results are natural and last for an average of 10-12 months, depending on the patient and the areas of the face treated.

# Surface<sup>VOLUME</sup>

PARIS

**Surface Volume** is our latest and most extraordinary filler. It has a plumping effect and helps to revolumize areas including the cheeks and the oval of the face. Our product also corrects deep wrinkles.

By creating volume in targeted areas, our innovative filler plumps up and redefines facial contours. It can also be used to add more definition to the oval of the face. To achieve an optimal result, a **Surface Volume** injection is recommended every 10-12 months, depending on the patient and the areas of the face treated.

# MESOTHERAPY

## REVEAL YOUR NATURAL BEAUTY

Your skin gets tired and loses its radiance due to pollution and stress. With mesotherapy, skin is hydrated, even-looking and more supple.

# Surface<sup>MESO</sup>

— P A R I S —

**Surface Meso** is a non-invasive treatment. Developed by our innovative laboratory, its formula leaves skin soothed and hydrated. Dimethylaminoethanol, one of the key active ingredients found in our formula, is used preservative-free. A cocktail of vitamins offers your skin the energy it needs to stay beautiful.

**Surface Meso** improves the skin's appearance and enhances the complexion. Every woman deserves the best. Stay natural, stay simple, stay gorgeous: start using **Surface Meso** now.

Our five-week treatments are supplied with a mesoroller for home use, which allows you to apply the product safely once a week to refresh your skin.

The mesoroller is an extremely precise and effective tool. It allows the product to penetrate the outer layers of the epidermis. The 540 micro-needles boost the product's penetration and regenerate the skin.

# Surface<sup>WHITE</sup>

— P A R I S —

**Surface White** is a cocktail of lightening active ingredients and antioxidants, which illuminate and revitalize your skin. The natural formula is produced using Glutathione and water.

**Surface White** is a safe and natural way to illuminate your skin.

Glutathione is an antioxidant, composed of an amino acid called cysteine, glutamate and glycine. This antioxidant is found in high quantities particularly in the liver, pancreas, spleen and eyes. Its concentration decreases naturally with age. Glutathione reduces the level of cysteine on the protein surface, helping to repair DNA and making it easier to recycle vitamins C and E. It plays an essential role in detoxifying the body. Thanks to its detoxifying effect, Glutathione slows and reduces the signs of aging. Glutathione has a lightening effect on skin thanks to different mechanisms at various stages of melanogenesis. Its antioxidant action allows it to inhibit melanin synthesis while calming free radicals and peroxides.

# COSMECEUTICALS ENHANCE YOUR SKIN TONE

The range of cosmeceuticals by Surface improves the evenness of your complexion and reduces pigmentation

# Surface CREAM

PARIS

## Surface Brightening face cream THE EXPERT SKIN ILLUMINATOR

- With the GABA complex in 3% concentration -

The patented **GABA complex** has been specifically developed to brighten and even out the complexion by safely correcting pigment irregularities. This formula leaves the skin hydrated.

Specifically designed to treat the face, this cream is lightweight and applies evenly.

Thanks to the GABA Complex in 3% concentration, **Surface Cream** has a remarkable effect on the complexion's radiance and evenness after only 28 days of treatment.

# Surface SERUM

PARIS

## Anti-pigment spot concentrated serum FOR THE PERFECT FACE

- With GABA complex in 10% concentration -

This extra-concentrated serum has been formulated to **reduce pigment spots**. The serum is paraben-free and is easily absorbed into the skin.

After 4 weeks of treatment, the results are impressive: **pigment spots are reduced by 80%\***. Apply twice a day over the entire face. It can also be used in combination with Surface Lightening Face Cream for optimal efficacy, offering a complete solution to enhance your complexion.

\*Tested by a panel of 20 people

A close-up portrait of a woman with her hair pulled back, wearing dark, cat-eye sunglasses. She has a serene expression and is looking directly at the camera. Her right arm is raised behind her head, and her left hand rests on her shoulder. She is wearing a wide, sparkling bracelet made of many clear, faceted stones. The background is a soft, out-of-focus light gray.

# WHITEBOX

## FOR COMBINED ACTIONS

Whitebox by Surface is a unique skin-lightening treatment that combines three complementary products for an optimal result.

# Whitebox

by Surface  
PARIS

**Whitebox** is a revolutionary treatment formulated to lighten the skin and reduce pigment spots. Developed by numerous scientists and tested over several months, this unique solution responds to all your major skin problems. The five-week protocol has proven efficacy: skin appears smooth and flawless.

Over the years, research has shown that combining the GABA Complex with Glutathione increases its reducing effect on pigment spots. The GABA Complex helps to create an even skin tone while Glutathione deeply detoxifies the skin. **Whitebox** brings these discoveries together to offer a unique treatment.

In **Whitebox**, you will find:

- A *brightening face cream* formulated to correct pigment irregularities.
- A *concentrated anti-pigment spot serum* for the face that is highly enriched with the active GABA complex and particularly effective against pigment spots.
- A *cocktail of brightening agents and antioxidants* that help to maintain a luminous complexion
- A *mesoroller* so you can apply Surface White in complete safety from the comfort of your home.
